Pretty fun, not big enough community, blow stuff up. They even have a discord server. If you are a console gamer, this is a good game to transition to, especially because of controller support. It's more optimized than Fallout. Have fun with this, and bring more of your friends into the community! It's kinda lonely here! Other than that, this game is an amazing work of art. The developers talk to you in the discord server! Imagine Duck Game but tanks and more whistles and less quacks. It's a perfect game for even an intel compute stick. All in all, this game is amazing and I would love for more people to play.. + can arrest people from the start with the dungeon

- + police blimps are cool
- + rangers are cool (probably too expensive though)
- + 'socialist state' objectives giving me 20 free gardens makes me happy - I love gardens
- + quest is penultimo based

The spy actions are neutral, sure you can steal stuff from others, but they also steal from you.

- quest story was dissapointing; very weak plot
- APCs are meh
- enemy spies blow up expensive buildings (always my distillery and sometimes the cigar), only an issue early in game
- rangers don't venture far enough to make their exploring function worthwhile
- DLC is too expensive to say it's worth \$27 AUD I paid for it

OVERALL

Not bad, but nothing fabulous either. Only thing I really care for is the dungeon to fill that annoying niche of being unable to deal with criminals early on. And my free gardens. Recommended if you really love tropico, or if it goes on sale.. Damn, I think I'm the first to M'buy this game.

I have a little bit of experince with HTML , I learned it for a year.

If this game would have been invented before, I would have tell my teacher to go herself and show her this game.

It is a user-friendly game, easy to understand with visual example, you don't have to be a smart person to get the idea.

If you want to learn HTML this is the game for you, buy it instead of wasting a year of your life on how to do a hyper link...

+It's Co-Op!. First -> sry for bad englando :)

Second -> WTF is this?!?!?!?

This game has only the most basic elements of basic elements of the whole shooter genre. And the game itself isn't good....

1. If you are a foreigner who can't read chinese characters you are f*cked! Because the game doesn't explain anything.

(I am a foreigner and I can read something, but that doesnt help here).

2. I think there are 3 modes (I "think" because I can't read the names)

- 2.1. Something like a campaign (or only a tutorial) -> but already in the first seconds of the game you don't know what

you have to do. You are locked between 2 doors and left/right of you are a shooting-range and a small river --> What you must do to get away from this place? what is the mission/target? --> I have no clue...

There is only one signature which (maybe) will show you what you have to do, but the explanation is only in chinese characters... I pushed every button on the mouse/Keyboard multiple times but nothing worked. And by some buttons-functions you don't even know whats going on... --> So this mode is already over before it began.

-2.2. Something like a (online) multiplayer --> but I think nobody plays the game so its nearly worthless

-2.3. Something like a match-system with bots --> The funny thing is, some of the maps doesn't start and bring you back to the main-menu of the game. And sometimes the other maps which works without problems, can't be suddenly started (it changed from time to time, lol). Why you can sometimes start a match and sometimes you can't and brings you automatically back to the game-menu???

By the way, the matches with the bots are the only real game experience and it is super bad. The teammates are only clones of each others. Sometimes I get shoot-hits but when I am looking around there are no enemies --> I think in these times I get friendly fire dmg from my bot-team-members, but I don't even stand between my bot-friends and the bot-enemies so why they shoot me? lol

- The game has without the main-menu and the Beginning of a bot-match-Music no soundtrack. The sounds are not very good but it's acceptable.

Is there a good thing in the game? --> maybe yes, if you are learning chinese. Maybe you can learn what the chinese words for "medic" or something else is. And what I especially liked was a place in the main-menu where you can get some informations (I think its abouts differently drugs and their effects etc.). Its for sure interesting for chinese-learners who are advanced enough to understand it (but I understand nothing :D:D:D) -> I think this is the coolest part of the game

I thought this game will be very cool, (my first chinese game) with chinese anti-drugs police vs drug dealers and sh*t like that. And I thought if you have enough passion than you can play it without the language problems anyway. --> But finally the game is just bad.

I got the game with a reduced price and its still a waste :/. Nice but Hard :). 10/10

The Devs decided the main game was way to easy. So they added two bosses with resistance to everything. I am on new game plus. I haven't had much of an issue with the main game bosses. I thought i could take these guys. I was so so sorely mistaken.. Quite a fun arcade style platformer.

Recommend using an arcade stick for that authentic feel! xD.

i really liked these player profile especially fallen and get right. it just lodes a box of code then quits anyadvice. Great game, even better if you grew up in the 70-80s. The amount of different characters you recognise that you had forgot about is amazing. They have packed a lot of references in there. I won't name them as half the fun is recognising them and shouting it out. The game is an obvious clone of Paperboy but in my opinion it is much better and more fun to play. Plus you don't need a bicycle controller to play it! I find it easier to play with a controller. Unfortunately the game does not support a controller but I use Pinnacle to get around this. There are only 4 keys anyway so its not really an issue. The difficulty level is spot on leading you to the feeling of "Just one more go" and one more go becomes 10 more goes etc... Highly recommended at the full price.. So nice you buy it twice!. Quite simply, the narration in this game deserves an award all on it's own
